

where the grass is always greener

COUNTY GREENS USGA SPECIFICATION SHEET

DETAILS

County Greens USGA is suitable only for golf and bowling greens as it requires regular skilled maintenance. This fine textured turf has a dense close mown sward to produce the perfect putting and bowling surface.

The main difference to our standard greens turf is it is an instant play specification, mown down to 8mm and sand dressed to give it a very dense firm sward to facilitate immediate use. It is also grown on USGA imported sand.

TYPICAL SEED COMPOSITION – COUNTY GREENS USGA

Grass Species

- **30% Camanette** – Chewings Fescue
- **30% Charlotte** – Slender Creeping Red Fescue
- **20% Aber Regal** – Browntop Bent
- **20% Aber Royal** – Browntop Bent

S.T.R.I. CULTIVAR PROFILE

- Camanette** The top Chewings Fescue in 2024. Scoring the best shoot density of an 8 and incredibly highly rated for visual merit. An excellent disease resistance. Consistent year round greenness and performs exceptionally well under greens heights.
- Charlotte** A slender creeping red that is rated highly in 2024 for shoot density and visual merit. Boasting disease resistance and an excellent greenness throughout the seasons enabling it to maintain a consistency of colour year round.
- Aber Regal** Strikes an excellent balance between shoot density and visual merit. An outstanding fineness of leaf and the highest score of the Bentgrass table for Winter greenness. Aber Regal also boasts the highest disease resistance score of the cultivars and tolerates extremely close mowing.
- Aber Royal** One of the highest rated cultivars for both summer and winter greenness. An exceptional resistance to disease and tolerant of close mowing.
