COUNTY SHADE SPECIFICATION SHEET

DETAILS

If the health of your turf is an issue in shaded areas, County Shade provides the solution. This medium texture, low-maintenance turf is grown using grass cultivars which flourish in a shaded environment. It is grown for a minimum of 18 months before harvesting.

County Shade is suitable for use in municipal gardens, shaded landscapes and lawns, all recreational areas and on golf tees and racecourses.

Key benefits:
- Extremely High Shade Tolerance
- Medium texture - grown for 18months
- Exceptional wear tolerance due to high shoot density
- Superb year round colour - impassive to climate change
- Drought tolerant
- Requires less fertilizer but little and often

TYPICAL SEED COMPOSITION – COUNTY SHADE
Grass Species

- **30%** **EuroCordus** – Perennial Ryegrass
- **20%** **Armani** – Tall Fescue
- **50%** **Limousine** – Smooth Stalked Meadow grass

S.T.R.I. CULTIVAR PROFILE

EuroCordus One of the top rated Perennial Ryegrass cultivars in 2024 with an excellent score for both recovery and shoot density. EuroCordus can boast an excellent color in both summer and winter and a suburb disease resistance.

Armani A Tall Fescue cultivar native to Europe with fantastic scores for shoot density and recovery enabling excellent shade resistant qualities. A deep root system also gives an increased tolerance to drought.

Limousine Limousine has been one of the best rated smooth stalk cultivars for the past 25 years. It is top of the table when looking at shoot density with a score of 7.9. It also boasts high scores in recovery and disease resistance and has enormous durability.

KEY DATA

Roll Size

Standard Roll	1 m^2 610mm wide x 1 .64m long
Big Roll	20m^2 740mm wide x 27.1m long
Extra Wide Big Roll	35m^2 1250mm wide x 28m long
Washed Turf Roll	Available in all above sizes

Soil and Thickness Grown on sand/sandy loam and standard thickness 15-20mm

Laying Equipment Tractor mounted Big Roll laying frames (Free loan)
Full contracted laying service
